Remarks about this subject / explanation of your answers to the previous questions -

Strong points are:

Great communication
Approachable lecturer
~~very motivated~~

no test, but assignments and a final report which requires many of the explained methods to be applied.

→ The teacher knows what he is teaching and perfected its contents.

The lectures of the lecturer and the assignments are/were super interesting.

~~Very nice setup of the course~~

- has the class under control
- strict

Very interesting course, although time consuming. A lot of freedom and interesting challenging assignments to introduce the courses. One of the more interesting courses I've done.

- ~~Extra~~ inclusion of students
- Son very good presentations

inspirational, speaks to me (good examples).
Good guidance throughout the final project.

We started lightly but thoroughly preparing by understanding the basics. We then moved on to more advanced research. Pace was good, a huge amount of info learned in a manageable manner. Good to learn from other students.

Great at giving lectures. Very thorough with everything. Always there to answer questions. Fair.

learned a lot, good pace, was really nice that he was fast with responding on questions and delivering of grades.

interesting course

Interesting course, liked the practical assignments and seminar style lectures.

Interesting, fun project

The professor has a good teaching skill.

Weak points are (please suggest improvements):

requires alot more time compared no other courses.

there could be some more help with the paper.

Too bad the majority of theory is presented by students, since ithink they can not explain it nearly as good and are often not that good at presenting/explaining.

- ~~Read~~ heavy workload

With the assignment planning there had to be a relatively quick switch between finishing assignment 2 and having a lot of your project figured out for the Paper Peer review. While I'm sure it's enough, if you haven't given your project much thought it ends up being stressful.

- too long presentation
- too little information about presentation style

Assignments (especially 2) were somewhat large.

Too many TO-DO's! It's heavy.

too much presentations of students, could better be combined with lecturer ~~class~~ presentation

student presentation took too much time. ~~I can not learn some~~

I feel like the amount of ~~work~~ work required to complete the course was ~~a little~~ too high. I hardly had time to work on other courses when the seminar was finishing.

If I had followed the default number of courses this semester, I would not have had the time to complete the assignments & project

Assignments are heavy.
