

Robotics Final Project Deliverables

Due Monday May 27th

The three deliverables for your Final Robotics Project are:

(1) A 2- to 3-page report (as a pdf-file) with the following contents:

- The title of your project.
- All the names of your team members, with student ID numbers.
- Abstract.
- Introduction with the description and goals of your project.
- A clear description of which parts of the project were done by yourself and what parts were re- used from existing code/work (add references).
- A scientific overview of what your system is capable of.
- Please add at least 2 screenshots of your project in action.
- Conclusions and discussion.
- References.
- Appendix I: An overview of the system requirements.
- Appendix II: Complete and very clear instructions on how to get your demo working.
Note: if necessary, you can exclude the Appendices from the page count.

(2) A zip-file with all the code necessary to redo your demo following your instructions in your report (Appendix II).

(3) A video file of less than 60 seconds showing your demo.
