# Robotics Final Project Deliverables

Due Wednesday June 7th 2023

The three deliverables for your Final Robotics Project are:

(1) A link to a short movie of a demo of your project, starting with the title and list of team members (max 60 seconds).

(2) A link to a zip file or github containing all the project related code, designs, etc. and a ReadMe-file with clear instructions on how to use/employ it. (Note: the link should be available/work to at least August 31st 2023).

(3) A technical report (pdf) describing your project (max 4 pages), typically consisting of:
- Title of your project.
- All the names of the authors, i.e., your team members.
- Abstract.
- Intro, novelty, related work (if any), design, implementation, etc., results, conclusions, discussion, references.
- Please add at least 2 screenshots of your project in action.
- NB Also add the links from item (1) video-link and item (2) link to project-code etc., to the pdf.
- Use a clear scientific writing style.

Every team-member should upload the pdf of the technical report to Brightspace.
