Einstein?

Bohr?

Project Description

- Study the development of an augmented reality app

- Research question is the development of a software engineering problem of moderate complexity, with challenging elements of

  - image processing

  - app development

  - data visualization

  - user interaction

Supervision

- Collaboration with physics

- Involved from LIACS:

  – Michiel Helvesteijn,

  – Aske Plaat,

  – Michael Lew,

  – Fons Verbeek

- Contact: aske.plaat@gmail.com
